

HEALTHY MOMS. STRONG BABIES.

Here's how March of Dimes leads the fight for the health of all moms and babies:

RESEARCH

We fund and support research at our Prematurity Research Centers and in promising areas to find solutions and make lifesaving breakthroughs.

ADVOCATE

We fight for policies in the halls of government that prioritize the health of moms and babies.

SUPPORT

We comfort and assist moms and families throughout every stage of the pregnancy journey, even when things don't go according to plan.

EDUCATE

We offer resources and programs that help moms before, during and after pregnancy and give medical professionals the tools and best practices they need.

UNITE

We bring together organizations and professionals from diverse backgrounds to identify and act on solutions to improve equity and preterm birth prevention.

PARTNER

We partner with community organizations and health care providers to ensure moms and families have access to programs and services that support healthy pregnancies.

EACH YEAR IN RHODE ISLAND

10,638

babies are born

882

babies are born prematurely

320

babies are born with
a birth defect

60

babies die before their
first birthday

\$46 MILLION

is the societal cost
of preterm birth

In Rhode Island, March of Dimes is a champion for families, focusing on communities with the greatest need and fighting for the best possible care for all moms and babies.

RESEARCH

In 2018 March of Dimes invested nearly **\$20 million** in research to understand, treat and prevent the serious health problems that threaten babies. This research improves the care of mothers and babies in Rhode Island, throughout the United States and across the globe. At our **six Prematurity Research Centers** teams of brilliant minds from a range of disciplines look for answers and share discoveries to transform our understanding of preterm birth, including causes and preventions. Learn more at marchofdimes.org/research.

ADVOCATE

March of Dimes is a powerful voice for the needs of pregnant women, infants, children and families in Rhode Island. In 2019 top March of Dimes priorities include advocating to prevent preterm birth, protect moms from dying from pregnancy-related causes, and address the impact of the opioids crisis on moms, babies and families.

SUPPORT

March of Dimes helps families when a pregnancy doesn't go according to plan. In 2018 we launched the My NICU Baby™ app, providing free, easy to use information for all NICU families. Through the online Share Your Story® site and Facebook mentoring program, we bring together families impacted by the biggest health threats to mom and baby. We also educate families and staff and improve the NICU experience through our NICU Family Support® program in **Providence** and our Training Institute for health care professionals.

SOURCES AND NOTES: Births and preterm births — National Center for Health Statistics, final natality 2017. Preterm is less than 37 weeks gestation. Birth defects — Based on CDC estimate that 1 in 33 babies is born with one or more birth defect. Infant mortality — NCHS, infant mortality, 2016. Cost of preterm birth — Institute of Medicine report, 2007.

JOIN THE FIGHT

Because of friends like you, we can provide programs, tools and support for all moms and babies.

EDUCATE

March of Dimes helps all women have healthy pregnancies and strong babies by providing the latest health information in English and Spanish on preconception, prenatal, postpartum and newborn care. We communicate this information through our websites, social media, and community and workplace programs.

UNITE

March of Dimes proudly supports the work of the Rhode Island Task Force on Premature Births. Together we are addressing statewide opportunities to improve the system of care for women and their families. The task force is working to increase the use of progesterone shots (17P) for eligible mothers at risk of a repeat preterm birth, as well as ensuring women are as healthy as possible before, during and between pregnancies.

PARTNER

In Rhode Island, March of Dimes supports community-based organizations serving women at higher risk of poor birth outcomes to ensure that they have the information and tools they need to achieve their personal health goals before, during and between pregnancies. We partner with health insurers, state agencies and health care providers to reduce barriers to treatments and promote interventions that we know can reduce the risk of preterm birth, including 17P and smoking cessation resources.
